DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nesbitt (6,663,509). Nesbitt discloses a golf ball comprising a core, an inner cover layer (app's outer core), and an outer cover layer. The core is made from a high cis polybutadiene. The outer cover layer may be made from thermoplastic or thermoset polyurethanes. The outer cover layer has a thickness from 0.01 to 0.10 inch or 0.254 to 2.54 mm and has a Shore D hardness of 55 or less. The maximum load value is considered an obvious feature since the materials are similar and the hardness is within applicant's range. One of ordinary skill in the art would have varied the maximum load for the desired performance features.

Response to Arguments

Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.
